Subject: Penobscot School - Enhancing Language Learning Through Culinary Activity

Dear Dr. Seedhouse,

Thanks to your programming, French Digital Kitchen, and to MIT's program, Speak Italian with Your Mouth Full, we will be starting language learning through culinary activity here at Penobscot School. It will be slow, but we shall do it!

We have been located on the coast of Maine since 1986 and teach several languages year-round, offer cultural events and conduct English Immersions for adults and young adults from around the world during the summer. We are renovating our kitchen in preparation for this new language and cultural learning opportunity and would love to hear from you about how it is going.

Very best,

Joan R. LeMole, Executive Director
Penobscot School
