I just blogged about this exciting new project at Newcastle University, The French Digital Kitchen. Students learn French, using a task-based learning approach, in a digital kitchen that teaches them French and culinary skills at the same time. See the ICT4LT blog:

<http://ictforlanguageteachers.blogspot.com/2011/10/french-digital-kitchen.html>

Graham this sounds absolutely fantastic! Is there any way for normal teachers to take part, or is it just a project at the moment? I have a Y9 CLIL class and I am planning to do a food module in January, so it would be great to use this!

Noemie, they aim to outreach to schools now that the French materials are almost ready for dissemination. There is a contact form at this website:

<http://digitalinstitute.ncl.ac.uk/ilablearn/kitchen>

Professor Paul Seedhouse is the leader of the French Digital Kitchen project.
